## News

### Eye-catching air pollution control at the IFAT

08.06.2016 News

IFAT, world's leading trade fair and industry gathering of environmental technologies, celebrated its 50th anniversary this year.

The specialist department „air monitoring“ of the VDMA attended together with their member companies the trade fair in Munich. Infastaub also joined this event.

The fair presence was held under the motto „Air monitoring is value-added! Preventive. Integrated. Recovering.“ The adjacent Live Garden of the exhibitors' community made topics of air monitoring understandable and entertaining.

Besides the presentation of each company at the main stand, the Live Garden was focused on presenting demonstratively important topics of air monitoring to the fair visitors. This included dust collection, cleaning, explosion protection, dustfree disposal, safety at workplaces, energy efficiency, waste heat recovery as well as industrial safety and health protection.

For this reason, Infastaub had built a transparent cartridge filter. This way the inside could be observed during cleaning with impulses of pressurized air.
