News

„Minion“ or super mini filter?

25.06.2018 News

Their body reminds of the yellow plastic capsule of Kinder Surprise, however, they usually wear blue brace overalls, and they look around the world with one or two big round eyes. Of course, we talk about the Minions. Their fans know and love them as loyal servants who constantly look for a master. This is also the task of the newest development of Infastaub: reliable dedusting. What could be more appropriate than giving the filter unit the alias “Minion”?

The filter unit with the official type designation AJM 150 is just 17 cm in diameter, has a total height of 51 cm and is equipped with only one filter bag. The version as non-cleanable secondary filter is labelled INF 150. The housing is made of stainless steel by default. On demand, it may be welded absolutely gap-free or two-sided, for applications of the chemical or pharmaceutical industry. A variation made of stainless steel is also available.

Due to the minimal construction height, the filter units can be installed in areas with height limitations that do not allow installation of other versions.

A chemical company has already ordered 70 pieces of the new generation “Minion”.
