Current issue

What is actually doing ...?

Boris Lazar, manufacturing

Boris Lazar started working at Infastaub 10 years ago. Initially, the trained car mechanic was employed by a temporary employment agency and was later taken on as a permanent employee. Area of responsibility of the 47-year-old employee includes not only assembly work on standard filter units, but also all special and custom filter units.

How did you come to filter technology and Infastaub?

During my training as a car mechanic, I worked a lot in the body shop of my training company. I enjoyed the sheet metal work and the assembly of car body parts much more. At Infastaub, the end product is of course different, but here I am also responsible for assembling components.

Tell us something about your tasks in filter assembly.

In addition to assembling standard filter units, I am largely responsible for assembling special and custom filter units. These include, for example, all cassette filters and cartridge filters of our Infa-Micron series, which are technically more demanding than simple silo filters. Special designs include filter units that we present at our trade fairs, such as our filter unit with a housing made of acrylic glass. I would also like to build the Infa-Micron cassette filter out of acrylic glass for one of the next trade fairs. The most important components are inside the filter unit and with a transparent housing everything could be presented clearly.

You have been working at Infastaub for many years. What do you particularly like about your job?

On the one hand Infastaub as an employer, on the other hand the attraction lies in the assembly of the special filters. I like everything that is more complicated. And a cassette filter with five filter chambers is not only more complex because of its sheer size, but also technically more demanding. If then my suggestions for improvement can be implemented and have an influence on product development, I enjoy my job even more.

How do you recharge your batteries after the physical work?

My haven of peace is my home here in the Taunus where I have my roots. But at the forefront is my partner, with whom I spend my free time.

Three words that describe you?

Helpful, funny, curious

If you had one wish:

To stay healthy into old age.
