Current issue

Welding specialist training

Manufacturers of welded products must have suitable welding supervisory personnel available. Our colleague Niklas Wildt completed the training to become a welding specialist.

Manufacturers of welded products must have suitable welding supervisors so that the welding personnel receive the necessary welding or work instructions and all work can be carried out and monitored carefully. Training as a welding specialist has been an important further training opportunity for our colleague Niklas Wildt, which Infastaub has made possible for the employee.

Within 2 months, the 31-year-old gained the necessary expertise to independently and responsibly carry out welding work at Infastaub in the legally regulated area. The legally regulated area includes, for example, steel construction, rail vehicle construction and pressure equipment construction. Here, the use of qualified welding supervisors is mandatory when using welding production processes.
